

The Behavior Analyst is the official publication of the Society for the Advancement of Behavior Analysis (SABA). The purpose of SABA is to provide instruction and training in behavior analysis and to disseminate information about behavior analysis that is useful to the public and beneficial to the community.

APPOINTMENT OF ASSOCIATE EDITOR

I am pleased to announce the appointment of M. Jackson Marr to the new position of Associate Editor of *The Behavior Analyst*. He will be handling book reviews and all manuscripts for the Encore section of the journal. Please forward directly to him all book reviews, suggestions for book reviews, or ideas for the Encore section.

SABA

What is SABA?

SABA is the Society for the Advancement of Behavior Analysis. SABA is a nonprofit organization that was founded by behavior analysts to disseminate information about behavior analysis that is useful to the public and beneficial to the community. SABA also supports research and education in behavior analysis. SABA would not survive without the continuing support of behavior analysts.

Where do contributions go?

Your contribution will help to support the promotion of behavior analysis in education, publication, and research, or any endeavor oriented to the advancement of behavior analysis. Donors may specify what fund their money is allocated to.

Grants and Awards

Project Outreach was founded in 1984 to recognize programs that have successfully increased the participation of underrepresented groups in behavior analysis.

OBM Small Grants Program. In recognition of the importance of creativity in the field of organizational behavior management.

International Science and Engineering Fair. SABA presents an award for behavior analysis research each year at the International Science and Engineering Fair.

For more information

260 Wood Hall
Western Michigan University
Kalamazoo, MI 49008-5052

Categories of Contribution

President's Roundtable **\$1000**

Contribution acknowledged in *The Behavior Analyst* and on SABA's letterhead; information about SABA's investments; an invitation to attend and minutes from the annual Board of Directors meeting; and receive a gift subscription to *The Behavior Analyst* (\$35 value).

Foundation Circle **\$500-999**

Contribution acknowledged in *The Behavior Analyst*; information about SABA's investments; minutes from the annual Board of Directors meeting; and receive a gift subscription to *The Behavior Analyst* (\$35 value).

Bicentennial Group **\$200-499**

Contribution acknowledged in *The Behavior Analyst*; minutes from the annual Board of Directors meeting; and receive a gift subscription to *The Behavior Analyst* (\$35 value).

Century Club **\$100-199**

Contribution acknowledged in *The Behavior Analyst* and receive a gift subscription to *The Behavior Analyst* (\$35 value).

Friend of the Society **\$50-99**

Contribution acknowledged in *The Behavior Analyst* and receive a gift subscription to *The Behavior Analyst* (\$35 value).

Associate **\$25-49**

Contribution acknowledged in *The Behavior Analyst*.

Consider a subscription to the journal for original research relevant to the behavior of individual organisms. Review articles and theoretical papers also considered for publication. Six issues published yearly by the Society for the Experimental Analysis of Behavior.

— CONTENTS - JANUARY 1995 —

Anthony P. McLean and Neville M. Blampied. Resistance to reinforcement change in multiple and concurrent schedules assessed in transition and at steady state.

Mark Galizio and Margaret O. Liborio. The effects of cocaine on behavior maintained by timeout from avoidance.

Dianne McCarthy and Philip Voss. Delayed matching-to-sample performance: Effects of relative reinforcer frequency and of signaled versus unsignaled reinforcer magnitudes.

Brent Alsop, Rachel Rowley, and Cristina Fon. Human symbolic matching-to-sample performance: Effects of reinforcer and sample-stimulus probabilities.

William Temple, Jan M. Scown, and T. Mary Foster. Changeover delay and concurrent-schedule performance in domestic hens.

Alan Baron and Antoinette Leinenweber. Effects of variable-ratio conditioning history on sensitivity to fixed-interval contingencies in rats.

Kazuchika Manabe, Takashi Kawashima, and J. E. R. Staddon. Differential vocalization in budgerigars: Towards an experimental analysis of naming.

Enter your personal subscription NOW and receive all six 1995 issues. And make certain your library subscribes. Individuals (personal use only), \$24.00; institutions, \$106.00. Subscribers outside the U.S. should add \$6.00 for postage. Please send orders and checks (payable to JEAB) to

JEAB, Devonia Stein
Psychology Department
Indiana University
Bloomington, IN 47405-1301 USA

VISA and MasterCard orders are accepted.

Instructions for Contributors

CONTENT OF *THE BEHAVIOR ANALYST*

The Behavior Analyst contains general interest articles on theoretical, experimental, and applied topics in behavior analysis. Articles on the past, present, and future of behavior analysis, as well as its relation to other fields, are particularly appropriate for the journal. *The Behavior Analyst* also publishes literature reviews, discussions of previously published work, reinterpretations of published data, and articles on behaviorism as a philosophy that are suitable to the general readership of the journal. Basic and applied experimental studies with original data, as well as technical articles on philosophy, should be submitted elsewhere.

GUIDELINES FOR SUBMISSION

1. Submit an original and four clear copies of the complete manuscript.
2. The title page of each copy should include only the full title. The author(s) name(s), address(es), and any other identifying information must be omitted.
3. Provide three copies of a separate sheet including (a) any footnotes to the title (e.g., regarding acknowledgments), (b) the proper authorship and affiliation(s), (c) any footnote(s) to author name(s), and (d) a list of at least four to six key words for indexing purposes.
4. You may also provide the names and addresses of three to five people outside of your institution whom you would recommend as qualified reviewers of your manuscript.

EDITORIAL REVIEW

1. All manuscripts will be considered for suitability for publication in *The Behavior Analyst* by the Editor.
2. Reviewers are not sent the name or the institutional affiliation of the author.
3. Reviewers are selected by the editor handling the manuscript. At least three reviewers are selected, one or

more from the Editorial Board and the remainder selected as guest reviewers appropriate to the manuscript. Reviewer comments will be returned with any marked manuscripts and the editorial decision within approximately three to four months.

STYLE

1. Use the active voice in preference to the passive voice. The active is usually shorter and more lively to read, and more clearly specifies the agent of action.
2. Be specific rather than general whenever possible. A phrase such as, "We need to arrange contingencies to reinforce desired behaviors" communicates little. Instead, tell who needs to do what so that a reader can visualize the action described.
3. Back up assertions. Statements such as "There is a growing trend in . . ." leave a reader asking "Why do you say that?" Document with examples or data.
4. Avoid overuse of the weak verbs "to be" or "to have" as the main verb of the sentence. Avoid use of indefinite pronouns as the subjects of sentences (e.g., "It is . . .," "This is . . ." or "There are . . .").
5. Refer to the American Psychological Association Publication Manual (4th ed.) for further guidelines regarding manuscript organization, writing and editorial style, references, and typing.

MANUSCRIPT FORMAT

1. Prepare your manuscript in the form used by the American Psychological Association Publication Manual (4th ed.).
2. Type all sections double-spaced, including title, footnotes, and table headings. Put each table or figure on a labeled separate sheet. DO NOT enclose glossy black and white photographs of figures or illustrations.
3. Only underline words to be set in italics.

ARTICLES

Articles generally range in length from 15 to 25 double-spaced manuscript pages (excluding references). Include an abstract with the submission.

ON BOOKS

Suitable length for book reviews and commentary is 10 to 20 double-spaced manuscript pages.

ON TERMS

A length of two to five double-spaced manuscript pages is suitable.

IN RESPONSE

We encourage readers to submit comments in response to articles published in *The Behavior Analyst* or in other journals

with which our readers are likely to be familiar. Manuscript copy should not be longer than two double-spaced pages.

OTHER SUBMISSIONS

If you have something you feel would interest our readers, please submit it even if it does not belong in any of the above categories.

Address submissions to:
